

COMPANY PROFILE

**Your trusted partner in
electronics & software solutions**

PCB Design · PCBA · Embedded Systems
Testing & Servicing · Full-Stack Web Dev

ABOUT US

Who We Are

Our Story

EyakamTech is a dynamic startup at the intersection of hardware and software innovation. We specialize in providing end-to-end electronics and digital solutions — from designing and assembling printed circuit boards to building robust embedded systems and modern web applications.

Founded with a mission to empower businesses through cutting-edge technology, we serve clients across automation, retail, and enterprise sectors. Our tagline says it best: Elevate Your Tech.

Our Mission

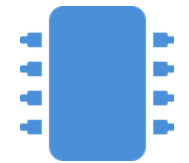

To deliver reliable, innovative technology solutions that help businesses grow and modernize their operations.

Our Vision

To become a trusted technology partner for automation and embedded systems across industries worldwide.

OUR SERVICES

Hardware & Electronics

PCB Design

Custom PCB layouts for automation, signage, and embedded systems. Schematic capture to final Gerber files.

PCBA

Full PCB Assembly services — component sourcing, soldering, and quality verification for production-ready boards.

Embedded Systems

Firmware and hardware integration for microcontroller-based systems, IoT devices, and industrial controllers.

Testing & Servicing

Functional testing, debugging, quality assurance, and ongoing maintenance of PCB-based products.

OUR SERVICES

Software & Web Development

Full-Stack Web Development

End-to-end web solutions — from single-page landing sites to full-featured web applications. We handle frontend design, backend APIs, and database integration, delivering clean, scalable products.

Web Applications

Customer portals, management dashboards, business tools

Landing Pages & Sites

Brand-focused, responsive websites for businesses

API & Backend

REST APIs, databases, server-side logic

WHY EYAKAMTECH

Our Edge & Target Market

End-to-End Capability

From schematic to software — we handle hardware and digital solutions under one roof.

Automation-Ready

Deep expertise in embedded systems for vending machines and industrial automation.

Startup-Focused

Fast iteration, direct communication, and competitive pricing tailored for growing businesses.

Proven Results

Successfully delivered for financial institutions, electronics firms, and retail clients.

Target Industries

Vending Machine Automation

Industrial Control Systems

Retail & Digital Signage

Financial Display Boards

SME Web Platforms

Hardware Startups

PAST WORK

Projects & Portfolio

sign&signages — Bank Interest Display Board

Electronics · Signage

Designed and assembled a custom PCB for a bank's live interest rate display board, along with company signage integration — delivering reliable, always-on digital information display.

Vizewire — PCB Design & PCBA

PCB Design · Assembly

Completed end-to-end PCB design and assembly for Vizewires, including schematic design, layout optimization, and full PCBA to production-ready standard.

Rhythm Fashion — Web App

Full-Stack Web Development

Built a customer management web application and public-facing website for Rhythm Fashion boutique, enabling seamless client records, inventory insights, and online brand presence.

Astro App — Startup Partnership

App Development

Contributed as a technology partner to a fellow startup's astrology mobile/web application, bringing both embedded and software development expertise to the collaboration.
